Tool hand cart for drills and bits.

PDF Version of the webpage (first pages)

Tool Cart

The purpose of the tool cart is to have a readily accessible hand cart which holds and organizes cordless tools, drills, and bits. It's amazing how much easier it is to build projects with a modular cart of tools.

Try to select a battery powered tool system that uses the same batteries.

10/27/2023

Tool Cart Back

This is the back of the tool cart. It has a slip-on plywood attach hard point for the cordless drills and bits. It also stores clamps.

Standardized Tool Driver and Bits

Instead of having loads of different screwdrivers, which take up lots of space, consider having a few drivers with multiple bits. Much easier to organize, carry around, and easier to build projects.
