

Rib Zodiac Inflatable

Ever wonder how to revamp a old inflatable ? Wonder how to make your expensive RIB unsinkable ? It's simple, inexpensive, and may protect your investment.

1. Use rolled bubble pack, or commercially available insulation like Reflectix.
2. Cut open your RIB or inflatable. If you want to practice, get a free inflatable from the boneyard or social media listing.
3. Place rolled bubblepack into chamber.
4. For more permanent solutions, roll in fiberglass with epoxy first, then install into inflatable chamber, then vacuum bag to hard.
