

Air Pump Hydro

An air pump can provide a simple water lift for a 5 gallon bucket hydroponics system.

Hydroponics

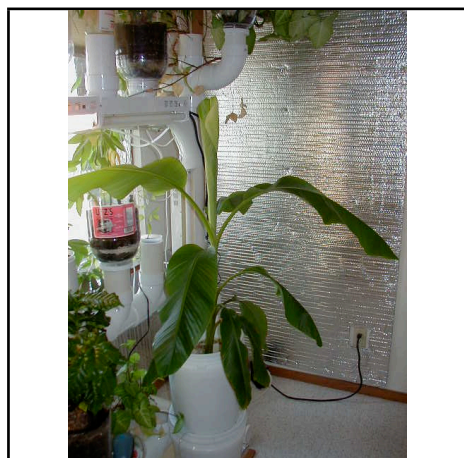

A two 5 gallon bucket hydroponics system.

Hydroponics Banana

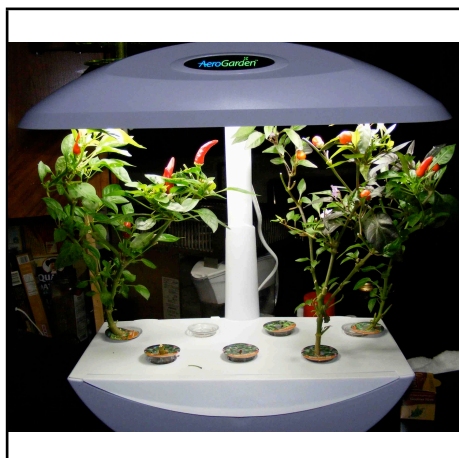

Hydroponics can be used for both vegetables and fruits.

PVC AeroPonics

PVC AeroPonics systems provide the most space efficient and weight conscience options for on-board growing solutions to provide fresh vegetables, herbs, and fruits.

LED Based AeroPonics

LED AeroPonics offer a compact solution for herb and small vegetable growing options.

Solar Water Maker

Solar stills can provide fresh water in an emergency, or water for on-board plants and hydroponics systems.

Summary: Fresh nutrition can be grown on-board using micro greens or sprouts. For vegetables, compact and energy efficient options include hydroponics and AeroPonics.
